SUMMARY

AI Agent Developer and Full-Stack Engineer with experience building LLM-powered agents, MCP-integrated agentic systems, and end-to-end automation workflows. Proficient in Python, N8N, Zapier, and modern web frameworks. Passionate about AI automation, chatbot development, and delivering production-ready solutions for real business needs.

TECHNICAL SKILLS

AI & Automation: AI Agents, LLMs (GPT / Groq / Claude), MCP (Model Context Protocol), N8N, Zapier, Chatbot Development and AI-Powered Development, Prompt Engineering

Languages: Python, JavaScript, C, C++, Java

Frameworks: React.js, Node.js, Express.js

Databases: MongoDB, SQL

Frontend & Tools: Tailwind CSS, HTML/CSS, Redux Toolkit, Chart.js, Three.js, REST APIs

EXPERIENCE

BrandIQ & LoopLab

Jan 2025 – Jun 2026

AI Agent Developer & Full-Stack Intern (Sister Startups, Same Founders)

Kolkata, WB

- Built AI-powered agents and chatbots using LLMs (GPT, Groq, Claude) to automate client workflows and business operations end-to-end.
- Designed MCP (Model Context Protocol) integrations connecting AI agents to external tools, APIs, and data sources for autonomous agentic task execution.
- Developed multi-step automation pipelines using N8N and Zapier with AI decision nodes, eliminating manual overhead across multiple client businesses.
- Researched and rapidly prototyped emerging AI tools and frameworks; delivered websites and full-stack applications for clients using AI-assisted development.

Zidio Development

Jun 2025 – Present

Full Stack Development Intern

Remote

- Engineered ExcelViz, a data visualization platform with interactive 2D/3D chart rendering using React.js, Chart.js, and Three.js with Redux-managed state.
- Built BlogLife, a full-stack blogging platform with JWT authentication, admin dashboard, and MongoDB-backed REST API using Node.js and Express.js.

PROJECTS

AI Automation Workflows | N8N, Zapier, LLMs, REST APIs

- Designed and deployed end-to-end automation pipelines integrating LLM decision nodes, webhooks, and third-party APIs to fully automate business processes.

ExcelViz | React.js, Redux Toolkit, Chart.js, Three.js, Tailwind CSS

- Web app to visualize Excel data through interactive 2D/3D charts with dynamic axis selection and responsive design.

BlogLife | React.js, Node.js, Express.js, MongoDB, JWT

- Full-stack blogging platform with rich text editing, user authentication, commenting, liking, and category-based filtering.

Atmoscan | React.js, Node.js, OpenWeatherMap API

- Real-time weather dashboard displaying temperature, humidity, air quality, and wind speed; built as a functional prototype in a 24-hour hackathon.

EDUCATION

Sister Nivedita University

Kolkata, West Bengal

B.Tech – Computer Science & Engineering | CGPA: 7.5

Jul 2024 – Present

- Solved 100+ DSA problems; active participant in hackathons, coding contests, and open-source communities.
